

Sophos Protection Suite

Essential threat protection, all from one vendor

- ▶ Combines endpoint, email, web and data protection—all in one license—to give you the best threat protection across all points and platforms
- ▶ Layered data protection with full-disk, device and content control at the gateway. Need content control on your endpoints too? It's available in our [Sophos Protection Suite—Advanced](#)
- ▶ Uses the same engine across all platforms and points including desktops, laptops and Exchange servers, as well as the email and web gateways
- ▶ Provides easy switching and deployment tools, active threat and data protection intelligence, real-time dashboards, intuitive management consoles, role-based administration and wizard-driven policy tools
- ▶ Delivers global and fully-integrated threat analysis, covering the complete range of evolving threats—web, spam, malware, viruses and more
- ▶ Includes 24/7 [certified expert support](#), one-on-one assistance, anti-malware updates and product upgrades

Sophos Protection Suite gives you the antivirus and endpoint threat protection you need—plus the device control, encryption, web and email gateway security you want.

This bundle gives you the essentials to control what's coming in to your network, reduce your vulnerabilities, stop threats and protect your data.

Ideal for ...

Sophos Protection Suite is ideal for organizations requiring essential threat protection with a few locations and 500 users or less. Need application control, data control, Web Filtering in Endpoint, Patch Assessment and NAC? Do you have more than 500 users or require more management flexibility? Get the protection you need—compare our Endpoint products and solutions.

Protect Windows, Mac and Linux computers from our Endpoint Protection console.

Endpoint: Block threats, not productivity

We make it easy for you to keep your users safe without getting in the way of their work.

Detects and removes viruses, spyware, rootkits, Trojans, adware and potentially unwanted applications (PUAs). Independent testers say it's the most effective threat detection of any major vendor.

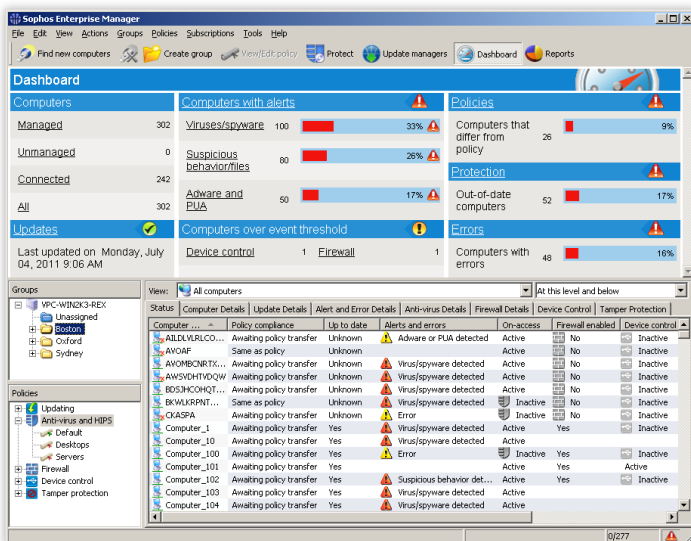

Minimizes the impact on computer performance with our single scanning engine that independent tests rate as the fastest of any major security vendor—now even faster in Endpoint 10.

Protects your Windows, Mac and Linux systems from one management console.

Stops new threats with live checks for malware and malicious websites against our reputation database.

Provides device control so you can easily set rules for using removable storage devices.

Centrally deploys small and frequent updates—now up to 41% faster than our last major upgrade—without affecting network bandwidth and system performance.

Email: Complete security and data protection

Stopping unwanted and malicious email from getting into your inbox while preventing confidential information from leaking out is simple. We provide end-to-end security across the entire email infrastructure, with hands-off and easy-to-use software.

Our software stops inbound threats, including spam, phishing attacks, spyware and malware, quickly and effectively.

Configurable policies give you the control you need to enforce acceptable email use. Know you're in compliance with legal and regulatory requirements.

Web: Complete web security and control at the gateway

Our secure web gateway solution provides integrated protection against malware and unwanted web content. It's built to deliver robust security with unrivalled simplicity and control. Stay ahead of the rapid evolution of threats—our web security provides complete protection enabling risk-free internet productivity.

We designed our antivirus engine to stop the most sophisticated threats, protecting your users from malware, spyware, fake antivirus, viruses and phishing.

Guard against malicious and hijacked trusted sites with our reputation database and filtering.

You keep your employees productive and out of trouble with internet use policies that are quick to enforce.

Keep users protected by blocking anonymizing proxies and scanning encrypted HTTPS traffic.

Stay compliant with our built-in file control and data loss prevention.

Encryption: Proven and certified

Our encryption protects data on the hard drives of both PCs and Macs. Encrypt files saved to your removable storage devices and attached to your emails. Best of all, this solution is easy to implement and helps you quickly meet your compliance needs while keeping your budget intact.

Protect your data with full-disk encryption technology.

Automatically supports Opal self-encrypting drives, and applies our award winning software encryption to all of your other computers.

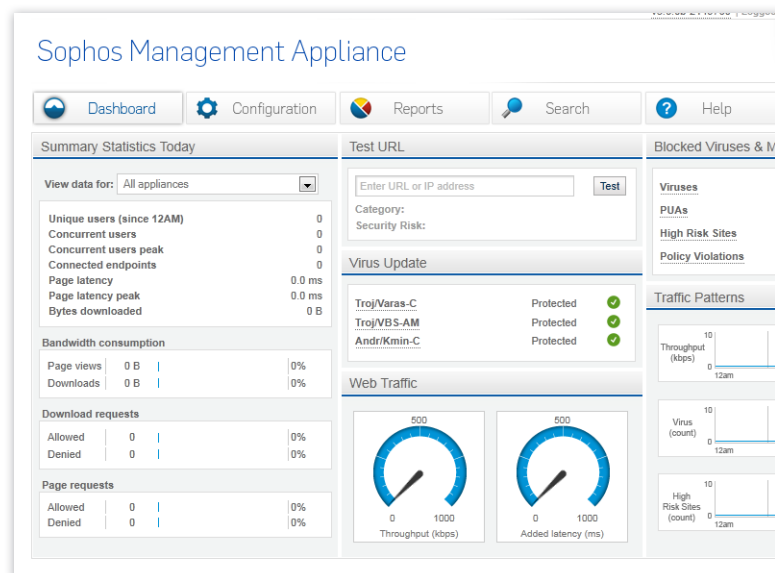

Our encryption protects the entire hard disk including the operating system files, hibernation and temp files.

We generate keys from the password, reducing the risk of storing enciphering keys on disk.

Quickly and easily implement your data security policy with the easy-to-use configuration wizard.

Install directly to individual computers or automatically to all computers across your network.

The simplified management and rich reporting of our Web Security and Control give you control and visibility of user's activity on the web.

All in one license

One license includes essential threat and data protection across all platforms at the endpoint, email and web gateways. Plus 24/7 support and free updates. Your Sophos Protection Suite license includes:

Endpoint Protection—Basic

- Complete threat protection with antivirus, HIPS and integrated firewall
- Cloud-based protection for checking suspicious files and URLs
- Controls the use of removable storage devices

Sophos Email Security and Control

- We've got you covered against spam, malware and data loss
- Configurable policies help you control email use and ensure compliance

Sophos Web Security and Control

- Manage everything with a simple, web-based management console
- Block all current threats, like malware, spyware, adware and phishing
- Get a handle on anonymizing proxies and filter encrypted traffic

SafeGuard Disk Encryption and Private Crypto

- Protect your data with our proven full-disk encryption technology
- Encrypt emails and attachments, protect USB files
- Control any connected USB drives, MP3 players and Bluetooth devices

Sophos PureMessage for Exchange

- Antivirus and anti-spam protection for your Microsoft Exchange servers

Languages Supported

English, French, German, Italian, Japanese, Spanish, Simplified and Traditional Chinese. However, not all language support is available on all components and platforms.
